

Ape Gorilla “Whitepaper”

Executive Summary

Welcome to the Ape Gorilla Club. Our mission is to empower our community in educational growth, business and networking opportunities, play to earn games, test our boundaries and create a community mindset around a Happiness Index, modeled by the Kingdom of Bhutan. Ape Gorilla was created by a motivated group of individuals who wanted to bring a community together with a product to make a positive change.

The Ape Gorilla NFT collection will serve access to this community, where every holder becomes part of the Ape Gorilla Club, giving everyone the same opportunities to grow, succeed and increase their personal happiness index. We will be providing angel investments to our holders business proposals with a combined worth of 750 ETH! We'll be selecting business proposals made by our NFT holders, with a minimum of \$5,000 and upto \$100,000 angel investment giveaway; Those business proposals of new (startup) or existing businesses, would require that the objective and outcome is to help others, or change peoples lives, in order to receive funding from the Ape Gorilla Club. Additionally, Ape Gorilla Club will facilitate and provide business drag-and-drop building software, business consultation services, educational academies teaching business, web3.0, crypto, NFT's and blockchain technology topics. Ape Gorilla will provide 700 ETH as a donation to the Community Growth Organization program created and in partnership with the people of the Kingdom of Bhutan, which will benefit the country's education, youth development, agriculture, and increase their Happiness Index. We will be launching a second "Royal Gorilla" NFT collection which will only be bought/mintable with existing Ape Gorilla NFT's by purchasing a "Golden Chalice" utilizing our upcoming "Meta Gorilla" ERC20 cryptocurrency token, to Evolve and Ascend the current Ape Gorilla to create a new 3D NFT in the "Royal Gorilla" collection. The "Royal Gorillas" will give additional access to yearly events held by the Ape Gorilla Club and upcoming Royal Gorilla Club. As mentioned, Ape Gorilla is launching "Meta Gorilla" Cryptocurrency Token. All Ape Gorilla NFT holders will be able to claim "Meta Gorilla" ERC20 Token rewards daily, as passive income for holding Ape Gorilla NFT. All Ape Gorilla NFT's will come with 3D files, which will be usable in the metaverse and be imported to future games. The "Meta Gorilla" token will also be utilized for our future FPS (First Person Shooter) 3D Games for Mobile, Desktop, and Consoles which will have play-to-earn utilities. Our team will also be working on a MMORPG 3D game "Ape Jungle Verse " in parallel to create a virtual environment that will serve as the metaverse play-to-earn role playing and PvP aspects. We want to create many jobs to secure our project roadmap, which will inevitably give back to the Ape Gorilla Community.

What is an NFT?

A non-fungible token is a unique and non-interchangeable unit of data stored on a digital ledger. NFT's can be associated with easily-reproducible items such as photos, videos, audio, and other types of digital files as unique items, and use blockchain technology to give the NFT a public proof of ownership.

The “Ape Gorilla” project

The Ape Gorilla NFT Community that gives the holder a lifetime value token, with customized Gorilla's being the unique art pieces of 11,337 3D NFT's named the “Ape Gorilla” project, which will grant all holders to the “Ape Gorilla Club” , and a month after the drop we will launch the “Royal Gorilla” project. Any holder of the Ape Gorilla NFT's would be able to buy “elixirs” or “magical gems” that will allow them to use their NFT's to create new “Royal Gorilla's”, which are enlightened versions and new art of the 3D Ape Gorilla, adding more rarity to the collection as the only way to obtain the ability to create the “Royal Gorilla”, you must own an Ape Gorilla NFT. The combination of the project sales will allow us to fulfill the projects Roadmap, Donations, Contribution and Collaborations for our community.
